PROJECTS

Flowboard, *AI / Python / Angular / Laravel*   2025
AI-powered Trello-inspired project manager built with Laravel, Angular, and a Python-based AI service.
Uses a local LLM to generate complete workspaces, supports multi-user Kanban boards with drag & drop, and enforces server-side ordering for consistency. Source Code ⧉

Financial Manager, *Remix / React / TypeScript / MongoDB* 2025
A personal financial manager built with Remix and React. It allows users to manage expenses, income, transactions, and balances in a simple and organized way.
Source Code ⬀

React Native Simple Todo, *React Native / SQLite* 2025
A Todo app that supports multiple lists and offline storage. Users can create, update, and organize tasks with persistent data using SQLite. Source Code ⬀

Git Search, *React / GitHub API* 2022
A GitHub search app that allows users to find repositories and developers through GitHub API integration. Source Code ⬀

Developer Manager, *Angular / Node.js* 2022
A Developer Manager app created for a company assessment, demonstrating CRUD operations, data handling, and front-end/back-end integration. Source Code ⬀

Portfolio, *React / TypeScript* 2025
A portfolio website built with React to showcase my projects and highlight full-stack development experience. Source Code ⬀

Education

High School 2017
