SUMMARY

Full Stack Developer with 6+ years of experience building modern web applications using Laravel, Angular, React, and Next.js. Experienced in designing APIs, developing scalable backend services, and creating responsive frontends. Comfortable working with Docker, relational and NoSQL databases, and agile workflows. Always open to learning new technologies and adapting to project needs.

PROFESSIONAL EXPERIENCE

Ambra

Jan 2022 - Mar 2026

Full Stack Developer

- Develop Angular frontends and Laravel APIs for internal systems.
- Implement backend services using Laravel and FastAPI.
- Work with MySQL and MongoDB databases for application data management.

Guardião Digital

May 2019 - Nov 2021

Full Stack Developer

- Built Angular frontends and Laravel backend services.
- Designed database queries and integrations using PostgreSQL.

Act Like You Matter

May 2025 - Jul 2025

Volunteer Frontend Developer

- Developed interactive frontend pages for a web game with animations and dynamic UI elements.
 - Collaborated on frontend architecture and UX improvements.
-

KEY PROJECTS

Flowboard — AI-powered project manager (Laravel, Angular, Python) Kanban-style project manager that uses a local LLM to generate workspaces and manage multi-user boards.

Financial Manager — Personal finance manager (Remix, React, TypeScript, MongoDB) Application for managing transactions, expenses, and balances with a modern UI.

Portfolio — Built with React, showcases my projects and highlights my full-stack development experience.
